

Get pet medications  
on your doorstep.

Send worry  
somewhere else.

# Home Delivery of *your* pets' medications makes life easier.

However, it doesn't always make things safe. Many online pharmacies sell medications that look and sound the same as the ones we prescribe but, in fact, are very different. That creates a scary situation for you and the pets you love.

That's why we're proud to now offer you Home Delivery of your pets' medications, from a source you can trust: us, your veterinary hospital.

---

## Safety, Delivered

Our Home Delivery is powered by VetSource, which means you can count on your pets' medications being checked and double-checked by licensed pharmacists to make sure they're accurate and won't react with any other meds your pet may be taking. It also means that the medications you receive are the exact same medications you'd get inside our hospital, with the exact same guarantee.

# Safety & convenience are our top priorities.

---

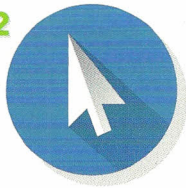

## But how exactly does VetSource work?

1

Your vet recommends  
a medication

2

You place an order  
through your vet's  
website

3

Your prescription is  
confirmed + verified  
by our licensed  
pharmacists

4

Your prescription is  
confirmed + verified  
once again

5

The prescription is  
packaged + shipped

6

The prescription arrives  
on your doorstep

# Convenience meets *peace of mind.*

Taking care of your pets shouldn't be a constant worry. So, in addition to Home Delivery, our partnership with VetSource means a few extra built-in conveniences.

---

## AutoShip

Allows you to get your pets' medications and nutrition products delivered on a regular schedule without having to place an order each time. That way, there's no chance of you ever running out.

---

## Remind Me™

Repackages your pets' monthly medications into single doses that arrive when the medications should be administered, removing any guesswork around when or what medications need to be given.

# Hundreds *of* Products

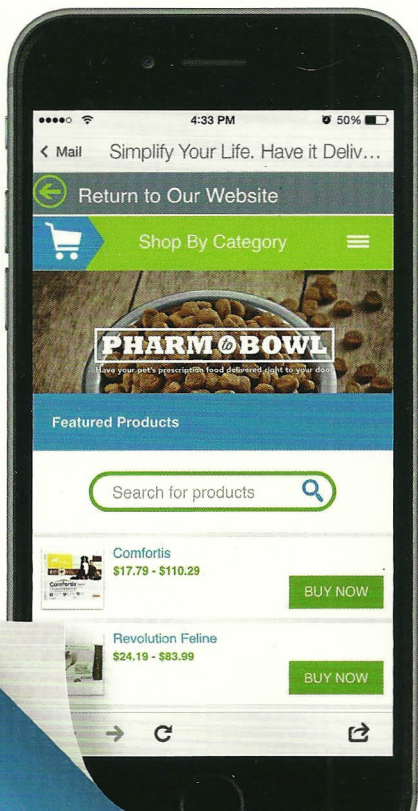

**Flea, Tick & Heartworm  
Preventatives**

**Chronic Medications**

**Nutrition Products**

**Prescription Drugs**

**And More!**

**Ready to keep your pets safe  
and make your life easier?**

Get started by talking with your veterinarian.  
Together, you can select the essential  
medications and nutrition for your pets.
